Provide proper identification

Allow for scanned and manual entries

Associate the appropriate program

Setup for both 38- and 16-digit coupons

The screenshot displays the 'Loyalty Card Configuration' web application. At the top, a blue information icon is followed by the text 'Edits require a one-time password (OTP)'. Below this, there are two tabs: 'Loyalty Card Configuration' (which is active) and 'Loyalty Mobile VAS Configuration'. In the top right corner of the configuration area, there are 'Add' and 'Delete' buttons. The main content is divided into two sections. On the left, under the heading 'Select Card', there is a list box containing two items: '8112-38' (which is selected) and '8112-16'. On the right, under the heading 'Card Information', there are several input fields and checkboxes. The fields include 'Card Table Index' (8112-38), 'Card Abbreviation' (NC), 'Card Name' (NACS PROSPR), 'Lower ISO' (8112), 'Upper ISO' (empty), and 'Pan Length' (38). Below these are checkboxes for 'Card Enabled' (checked), 'Accept Track 1' (checked), 'Accept Track 2' (unchecked), 'Accept Manual/Scanned Entry' (checked), and 'Hybrid Card' (unchecked). At the bottom of this section is a dropdown menu for 'Supported FEPs' with 'PCATS04' selected, and an 'Edit' button next to it.
